

HiWi - Student Assistant Radar Signal Processing

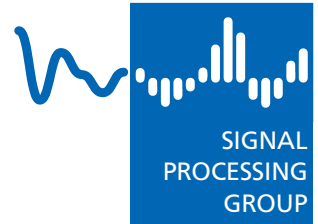

TECHNISCHE
UNIVERSITÄT
DARMSTADT

May 25th, 2023

Job Description

We are seeking a highly motivated student to join our team as a Student Assistant with a focus on radar signal processing. This position offers an excellent opportunity for a diligent and intellectually curious student who is passionate about radar technology. The primary responsibility of the Student Assistant will be to conduct extensive literature research, particularly in the field of distributed radar networks, and assist in gathering relevant information.

Responsibilities:

- Conduct literature research in the field of distributed radar networks.
- Read and analyze publications to gather information related to the topic.
- Summarize and organize key findings and methodologies from the literature.
- Assist in identifying gaps and trends in the literature.

Qualifications:

- Enrolled as a student at TU Darmstadt
- Excellent academic record with a strong emphasis on courses related to signal processing or radar.

If you meet the qualifications and have a strong desire to leverage this position as preparation for your master's thesis, we encourage you to apply for this exciting opportunity. Please submit your academic transcripts, and a brief statement outlining your interest in the position to christian.eckrich@spg.tu-darmstadt.de.
